

## **SWING TIPS**

### **Short swings**

If you are faced with a  $\frac{3}{4}$  swing or  $\frac{1}{2}$  swing depending on the distance required, remember this visual. The left picture shows a back swing, which swings the club more around with the body turn. The picture on the right shows a very upright swing using mainly hands. The incorrect position shows the arms and club pulled in too close to the body. Keep some extension in your arms by trying to turn your trunk and arms. Better contact and distance control will await you!

**Please contact me to work on your game or for fitting your clubs!**

Sincerely,

**Glenn Boswell
