

## **SWING TIPS**

### **Spot pitching**

Picking a visible spot on the green is used in pitching, chipping and putting. In the picture this fellow is hitting to a spot on the green, which is short of the hole. He will not want to hit at the hole, as the ball will roll too far past. Walk onto the green and visualize how the ball will roll towards the hole once it lands at the spot you chose. If you are in doubt when pitching onto the green, pick a ½ waypoint between the edge of the green and the hole and that is where you want it to land.

**Please contact me to work on your game or fitting your clubs!**

Sincerely,

**Glenn Boswell**
