

## **SWING TIPS**

### **Easy vs Difficult**

Around the greens we look to run the ball along the ground as much as possible. Sometimes, a more lofted shot is required, utilizing a sand wedge or more lofted wedge. In this picture, the ball with the arrow pointing at it is lying lower in the grass than the ball to the right. Use more of a hinge in your wrists in the back swing; this will help the ball come out higher.

You are probably saying to yourself “the ball on the left looks even more difficult”. You are absolutely correct; I would pick up and look for the drink cart!
