

SWING TIPS

Helping the club on short shots?

This refers to using your hands to help the club head lift the ball into the air on chips or pitch shots. **You don't want to do this!** Let the club lift the ball and try keeping your hands from being over active. Keep your hands in front of the club head while moving towards the target and better contact/distance control will be your reward!

Please contact me to work on your game or fitting your clubs!

Sincerely,

Glenn Boswell
